

**IT'S TIME TO RE-ELECT
YOUR REPRESENTATIVE ON THE PENSION BOARD!**

TOM BRUNO

Tom is currently the Chairman of the Public Employees' Retirement System (PERS) Board of Trustees and is your State Worker Representative. He is the first PERS Chairman to be asked to testify before the NJ Assembly on behalf of Pension members, and to ever litigate a sitting Governor (former Governor Chris Christie) in an effort to secure the state's full pension payment for employee pensions. He understands and defends the contractual right of public employees, who serve honorably, to receive their full pension. He is also a voting member of the State's Investment Council and was successful in his crusade to reduce investments in hedge funds from 12.5% to the current 3%, saving the Fund HUNDREDS of MILLIONS of dollars in management fees as a result, and was instrumental in securing Environmental, Social and Governance standards for our investment decisions and is a charter member of the Division of Investments, State Investment Council's ESG Subcommittee.

He has been a staunch advocate for public employees and is now up for re-election.

Tom has received the endorsement of the AFLCIO Public Employees Committee in the past which is comprised of NJ Unions who represent public workers throughout the State. He has also historically received the separate endorsements of IFPTE Local #195, AFSCME NJ Council 63, and several CWA Locals as well. He's been your champion defending your right to have a pension while leading the fight to protect it from political hacks.

In order to get on the ballot and continue to fight for public workers, ***he needs your help now.*** You can find additional information about Tom at <http://TomBruno.org>.
